01 — MARK EXPLORATIONS Four directions on one system · pick a lead, all share the trace grammar

A Trace monogram

The *ch* drawn as an open arc and gated H — nodes mark every terminal. Best as favicon / app mark.

B Control node

Agent traces converge on a gated core; one path breaks the ring at top — the human keeps final authority.

C Hand → traces

A splayed hand resolves into five precise traces rising from one bar. The human gesture, engineered.

D Rune stroke

Grounded, tactical strokes with engineered angles — a single-stamp glyph that holds at any size.

02 — WORDMARK & LOCKUP Humanist grotesk · color-split tells the story

THE COLOR SPLIT

class sits in muted stone — the structure, the machine, the system doing the work. **Human** carries the ember — the warm authority the whole brand defends.

SINGLE-COLOR STAMP

classHuman AI lives at the seam where human warmth meets machine discipline, so the identity pairs a grounded sunset-clay palette — pulled from the founders' earlier ventures — with circuit-trace geometry that stays precise, never cold. Every mark resolves a human gesture — a hand, a monogram, a decision node — into engineered traces that gate through one point: a literal picture of humans holding **final authority** over their agents. Warm primaries carry the **LAHA** spirit while a cool sage and disciplined type keep it tactical and confident — accessible AA-to-AAA in both light and dark.
